- American Association of School Administrators
- American Association of School Personnel Administrators
- Council of Chief State School Officers
- National Association of Elementary School Principals
- National Association of Secondary School Principals
- National School Boards Association
- National School Public Relations Association

Educational Research Service is an independent, nonprofit corporation serving the research and information needs of the nation's school systems, their administrative teams, school boards, and the public.

ERS serves as both a national source and clearinghouse for school management research and information. By compiling, analyzing, and sharing information that is essential to effective decision making, ERS assists local school districts in both day-to-day operations and long-range planning. It provides an invaluable approach to data gathering and information reporting through services that are geared to quick yet thorough response to requests from subscribers. An ERS subscription entitles the subscribing school system or agency to: • on-call information service for its administrative staff and governing board • an initial copy of each ERS conducted research study produced during the

subscription year • the monthly *ERS Bulletin* summarizing the research of other agencies.

To assure that small as well as large systems can benefit from ERS, a graduated subscription fee has been established. This enables subscribing agencies to share equitably in the cost of compiling and reporting the research needed by all school administrators and governing boards. ERS services are available at reasonable rates to associations of school administrators and school boards, as well as university departments of school administration. Services may be provided to other groups by special action of the ERS Board of Directors. Subscription rates are available upon request.

SYSTEM-BY-SYSTEM LISTING OF NUMBER OF STAFF MEMBERS AND NUMBER OF PUPILS AND TEACHERS PER STAFF MEMBER, 1977-78	46

FOREWORD

Although staffing patterns heavily influence both the quality of education and the school budget, school officials and others have not had current data by which to compare staffing patterns in their school system with those in systems of similar enrollment size and expenditure level. To help fill this void, ERS has developed this Report on school staffing ratios from information collected as part of the annual ERS *National Survey of Salaries and Wages in Public Schools* for 1977-78, which provides data on salaries, wages, and number of staff for 22 professional and 10 support positions.

Included in this Report are pupil-staff and teacher-staff ratios for individual positions and aggregate categories of professional personnel. These data are presented separately for large, medium, small, and very small school systems and for five levels of expenditure per pupil for current operations of the school systems.

Although the staffing ratio data contained in this Report are the best that are available at this time, users should be especially aware of the limitations of the data and their proper use. These are carefully identified in the Report.

ERS expresses gratitude and appreciation to the hundreds of school superintendents and school district staff members throughout the nation who supplied the data contained in this Report. Their willingness and ability to provide the detailed information made this Report possible.

Glen Robinson
Director of Research
Educational Research Service

HIGHLIGHTS

- Mean number of pupils per teacher in reporting school systems, 1977-78: 20.3; ranging from 18.6 in very small school systems (300 to 2,499 pupils) to 21.4 in medium school systems (10,000 to 24,999 pupils).
- Mean number of pupils per total professional staff member: 17.3; ranging from 16.0 in very small systems (300 to 2,499 pupils) to 18.1 in medium systems (10,000 to 24,999 pupils).
- Mean number of pupils per total administrative staff member: 249.6; ranging from 224.1 in very small systems (300 to 2,499 pupils) to 258.2 in large systems (25,000 or more pupils).
- Mean number of pupils per building level professional staff member: 17.9; ranging from 16.6 in very small systems (300 to 2,499 pupils) to 18.6 in medium systems (10,000 to 24,999 pupils).
- Mean number of pupils per building level administrative staff member: 409.1; ranging from 365.7 in very small systems (300 to 2,499 pupils) to 423.6 in medium systems (10,000 to 24,999 pupils).
- Mean number of pupils per central-office professional staff member: 733.5; median, 646.0; mean ranging from 683.3 in very small systems (300 to 2,499 pupils) to 772.2 in small systems (2,500 to 9,999 pupils).
- Mean number of pupils per principal: 633.3; ranging from 438.0 in very small school systems (300 to 2,499 pupils) to 716.4 in large systems (25,000 or more pupils).
- Mean number of pupils per assistant principal: 1,496.2; ranging from 1,307.0 in large systems (25,000 or more pupils) to 1,624.0 in small systems (2,500 to 9,999 pupils).
- Mean number of pupils per counselor: 761.9; median, 671.0; mean ranging from 737.4 in large systems (25,000 or more pupils) to 788.4 in small systems (2,500 to 9,999 pupils).
- Mean number of pupils per librarian: 1,279.0; median, 854.3; mean ranging from 790.5 in very small systems (300 to 2,499 pupils) to 1,655.7 in medium systems (10,000 to 24,999 pupils).
- Mean number of pupils per teacher, counselor, and librarian: 19.4; ranging from 17.7 in very small systems (300 to 2,499 pupils) to 20.3 in medium systems (10,000 to 24,999 pupils).
- Mean number of pupils per school nurse: 2,358.3; median, 1,568.4; mean ranging from 1,197.6 in very small systems (300 to 2,499 pupils) to 3,393.2 in large systems (25,000 or more pupils).
- Mean number of pupils per teacher aide: 275.7; median, 152.7; mean ranging from 228.5 in medium systems (10,000 to 24,999 pupils) to 339.8 in small systems (2,500 to 9,999 pupils).
- Mean number of teachers per total professional staff member (excluding teachers): 6.2; ranging from 5.9 in medium systems (10,000 to 24,999 pupils) to 6.8 in very small systems (300 to 2,499 pupils).
- Mean number of teachers per total administrative staff member: 12.3; ranging from 12.0 in very small (300 to 2,499 pupils) and medium systems (10,000 to 24,999 pupils) to 12.6 in small systems (2,500 to 9,999 pupils).
- Mean number of teachers per building level professional staff member (excluding teachers): 8.0; ranging from 7.2 in large systems (25,000 or more pupils) to 9.1 in very small systems (300 to 2,499 pupils).

- Mean number of teachers per building level administrative staff member: 20.2; ranging from 19.7 in very small systems (300 to 2,499 pupils) to 20.9 in small systems (2,500 to 9,999 pupils).
- Mean number of teachers per central-office professional staff member: 36.0; ranging from 33.9 in medium systems (10,000 to 24,999 pupils) to 37.8 in small systems (2,500 to 9,999 pupils).
- Mean number of teachers per principal: 31.0; ranging from 23.6 in very small systems (300 to 2,499 pupils) to 34.0 in large systems (25,000 or more pupils).
- Mean number of teachers per assistant principal: 72.6; ranging from 61.8 in large systems (25,000 or more pupils) to 80.1 in small systems (2,500 to 9,999 pupils).
- Mean number of teachers per teacher aide: 13.7; median, 7.5; mean ranging from 11.0 in medium systems (10,000 to 24,999 pupils) to 16.8 in small systems (2,500 to 9,999 pupils).

Introduction

School Staffing Ratios, 1977-78 is a companion study to the three-part report of the ERS *National Survey of Salaries and Wages in Public Schools, 1977-78*.^{1/} The survey, conducted in fall 1977, collected data on salaries scheduled and salaries paid for 22 selected professional positions and 10 selected support positions in public school systems throughout the United States for the current year. Data also were collected on the number of staff in each of these professional and support positions and the fall 1977 enrollment of the school system, from which various pupil-staff and teacher-staff ratios were computed.

SCOPE OF THE STUDY

The purpose of this study is to provide school administrators, school board members,

and others with accurate, timely, and reliable data useful in comparing staffing ratios in school systems of similar enrollment size and expenditure level. Staffing data are presented and analyzed according to two basic classifications:

1. By four enrollment groupings of school systems: (a) 25,000 or more pupils; (b) 10,000 to 24,999; (c) 2,500 to 9,999; and (d) 300 to 2,499.
2. By five per pupil expenditure levels of school systems: (a) \$2,000 or more per pupil; (b) \$1,600 to \$1,999; (c) \$1,300 to \$1,599; (d) \$1,100 to \$1,299; and (e) less than \$1,100.

In addition to the summary analyses, the Report contains a *tabular* listing of specific staffing data supplied by each reporting school system with school systems listed alphabetically by state.

To facilitate comparison of data reported by the responding school systems, there are two summary tables showing the mean number of pupils and the mean number of teachers per professional and per administrative staff member in the reporting systems, 21 tables showing distributions, means, medians, and ranges of pupil-staff and teacher-staff ratios by enrollment group, and 21 tables showing means

^{1/}*National Survey of Salaries and Wages in Public Schools, 1977-78*, published in 1978 by Educational Research Service, Inc., in three parts: Part I, *Scheduled Salaries for Professional Personnel in Public Schools, 1977-78*; Part II, *Salaries Paid Professional Personnel in Public Schools, 1977-78*; and Part III, *Wages and Salaries Paid Support Personnel in Public Schools, 1977-78*. Price: Part I, Part II, Part III, \$15.00 each if purchased separately; if purchased as a three-volume set, \$40.00. Available to ERS subscribers at half-price.

and medians, first and third quartiles, and ranges of staffing ratios by per pupil expenditure level and enrollment group.

The pupil-staff and teacher-staff ratios analyzed in this Report were provided by 1,159 public school systems for school year 1977-78. *Pupil-staff ratios* contained in the Report include the number of pupils per

- teacher
- counselor
- librarian
- teacher, counselor, and librarian
- school nurse
- school building level professional staff member
- principal
- assistant principal
- school building level administrative staff member
- central-office professional staff member
- central-office and school building level administrative staff member
- central-office and school building level professional staff member
- teacher aide

Teacher-staff ratios include the number of teachers per

- principal
- assistant principal
- school building level administrative staff member
- school building level professional staff member (excluding teachers)
- central-office professional staff member
- central-office and school building level administrative staff member
- central-office and school building level professional staff member (excluding teachers)
- teacher aides

It should be emphasized that these tables reflect only a summarization of the data reported to ERS by the responding school systems in the nationwide panel sample, which was stratified by enrollment size only, and that no attempt has been made to weight the data to obtain estimates of national statistics for categories of personnel listed.

Users of the data are urged to read carefully the section titled *Proper Use of Data* before drawing inferences from information contained in this Report.

STAFFING DEFINITIONS

For an accurate and consistent interpretation of the staffing ratios presented in this Report, it is essential to understand the differences among various staffing measures, in particular pupil-teacher ratio, class size, and pupil-staff and teacher-staff ratios.

In the 1977-78 ERS National Survey, school systems were asked to report their fall 1977 pupil enrollment, the number of full-time employees in 22 selected professional positions, 5 support positions, and the total number of hourly employees in 5 additional support positions (including teacher aides).

Pupil-teacher ratio, as defined in this Report, refers to the number of pupils in a school system divided by the number of full-time teachers in that school system. It is important to note that pupil-teacher ratio is not synonymous with class size, a common staffing statistic, but one that is not included in this Report. In its annual publication, *Statistics of Public Elementary and Secondary Day Schools*, the National Center for Education Statistics, a part of the U.S. Department of Health, Education, and Welfare, cautions users of its data on pupil-teacher

ratios to be aware of the differences between pupil-teacher ratio and class size:

The average number of pupils per classroom teacher, often used as a measure of teacher workload, is not a valid measure of average class size. Furthermore, pupil-teacher ratios do not reflect the educational services provided in varying degrees by staff outside the classroom. The ratios shown in [our] table[s] serve only as rough guidelines in studying the State-by-State situation, and more detailed information on other aspects of school staffing would be needed in order to make valid judgments.

As with pupil-teacher ratios, pupil-staff ratios in this Report are computed by dividing the number of pupils in a school system by the number of full-time staff in a specific position or aggregate staff category. Likewise, teacher-staff ratios are calculated by dividing the number of full-time teachers in a school system by the number of full-time staff in a specific position or aggregate staff category. However, in two teacher-staff ratios involving aggregate categories (the number of teachers per school building level professional staff member and the number of teachers per central-office and school building level professional staff member), the ratio is computed by dividing the number of full-time teachers in the school system by the sum of the personnel in positions in the aggregate category, excluding teachers.

The five major aggregate personnel categories contained in this Report include the following staff positions:

1. School Building Level Professional Staff

- principals
- assistant principals
- deans
- teachers
- counselors

- librarians
 - school nurses
 - other full-time professional staff at the school building level (social workers, visiting teachers, psychologists, etc.)
2. School Building Level Administrative Staff
- principals
 - assistant principals
 - deans
3. Central-Office Professional Staff
- superintendent
 - deputy, associate, and assistant superintendents
 - administrators for public relations or information, finance and business, staff personnel, and instruction
 - subject area supervisors
 - all other full-time central-office administrators (pupil personnel, research, food, health, transportation, federal aid, etc.)
4. Central-Office and School Building Level Administrative Staff
- all positions in categories 1 and 2 above
5. Central-Office and School Building Level Professional Staff
- all positions in categories 1 and 3 above.

SAMPLE DESIGN

In fall 1977, ERS mailed a comprehensive survey instrument, the 1977-78 version of the annual ERS *National Survey of Salaries and Wages in Public Schools*, to a national panel sample of public school systems, stratified by pupil enrollment. It requested information on 1977-78 salaries and wages and staffing

data for persons employed in 32 selected professional and support positions or functions. The questionnaire was mailed to 1,918 of the approximately 11,561 public school systems in the United States enrolling 300 or more pupils. This universe includes more than 99 percent of the 44,690,000 public school pupils enrolled in the nation in fall 1976. All of the 759 systems enrolling 10,000 or more pupils were sent questionnaires. (This group accounts for approximately 1.6 million employees or approximately 47 percent of all those employed in the public schools of the nation.)

In previous ERS salary and wage studies, a systematic random sample of 1 in 5 *small* school systems (2,500 to 9,999 pupils) was selected and a similar sample of 1 in 15 *very small* school systems (300 to 2,499 pupils) was selected. For a variety of reasons non-response was high in both strata. To help reduce possible nonresponse bias within these two strata, a panel sample was used in the 1976-77 and 1977-78 studies.

The 1977-78 panel sample was constructed by taking all school systems within each stratum that were originally randomly sampled and that have supplied data in at least one of the last three previous National Surveys of Salaries and Wages in Public Schools, and adding to this number additional school systems randomly selected to meet the number required by the 1 in 5 and 1 in 15 selection ratios for the stratum.

This procedure, along with other improvements, has significantly increased the number of *small* and *very small* school systems responding to the annual survey and substantially reduced the possible non-response bias. However, this procedure could affect the representativeness of the staffing data reported by these two enrollment groups in favor of small and very small

school systems with school administrators willing to respond to the survey and perhaps in other ways.

Table A shows the approximate number of school systems in the universe sampled, the equivalent selection ratios, and the numbers and percents of responses. It should be noted that this Report includes data from 13 school systems that responded too late to be included in the 1977-78 national salary and wage reports.

Of the 187 school systems with enrollments of 25,000 or more, 163 (87 percent) responded with usable data for inclusion in this Report. As shown in Table A, the response rates varied among the school systems in the four strata. Caution should therefore be used when making comparisons between and among the summary data reported for strata.

METHODS OF TABULATION

The school systems included in the system-by-system listing, which begins on page 46, are arranged in alphabetical order by state. Column 1 shows the name of each reporting system, the fall 1977 enrollment of the system, and the per pupil expenditure budgeted for current operations for school year 1977-78.

Columns 2 through 8 provide the number of staff, the number of pupils per staff member, and the number of teachers per staff member for seven individual and aggregate position categories:

- teachers
- principals
- total building administrative staff
- total building professional staff
- total central-office professional staff

TABLE A.—APPROXIMATE NUMBER OF PUBLIC ELEMENTARY AND SECONDARY SCHOOL SYSTEMS IN UNITED STATES ENROLLING 300 OR MORE PUPILS IN FALL 1976 BY ENROLLMENT GROUP, RATIOS USED TO SELECT STRATIFIED PANEL SAMPLE, AND REPORTING SCHOOL SYSTEMS

ENROLLMENT GROUP	NUMBER OF PUPILS (FALL 1976)	NUMBER OF SYSTEMS WITH 300 OR MORE PUPILS	SELECTION RATIOS	USABLE DATA SUBMITTED			
				NUMBER IN PANEL QUERIED	NUMBER OF SYSTEMS RESPONDING	PERCENT OF TOTAL QUERIED	PERCENT OF TOTAL RESPONDING
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
LARGE (25,000 OR MORE PUPILS)	12,658,371	187	1:1	187	163	87.2%	14.1%
MEDIUM (10,000 to 24,999 PUPILS)	8,303,428	572	1:1	572	320	55.9	27.6
SMALL (2,500 to 9,999 PUPILS)	15,373,610	3,275	1:5	662	408	61.6	35.2
VERY SMALL (300 to 2,499 PUPILS)	8,125,523	7,527	1:15	497	268	53.9	23.1
TOTAL	44,460,932	11,561		1,918	1,159	60.4	100.0

- total all administrative staff
- total all professional staff

Staff positions included in the personnel categories contained in the system-by-system listing are described on page 3.

Throughout the system-by-system listing, the letters ND (no data) appear where information was not available or was not usable because of apparent errors in reporting. Where a reporting system apparently did not have school personnel assigned to a position or function, three dots (. . .) appear in the appropriate space. Also, three dots always appear in the last row of Column 2. If an individual is assigned to perform two or more functions, he/she is reported in the position in which the largest amount of time is spent.

In some cases where there were apparent misunderstandings in the interpretation of the questionnaire, the responding persons in school systems were contacted to correct or verify the information reported on the questionnaire.

SUMMARY ANALYSIS

Tables 1 through 23 give summary data and percent distributions of the number of pupils and the number of teachers per professional and administrative staff member in reporting school systems, classified by four *enrollment* groups. Tables 24 through 44 include most of the pupil-staff and teacher-staff ratio categories found in Tables 1 through 23, but are classified by both *per pupil expenditure for current operations* and *enrollment* group. It should be noted that totals in Column 7 of Tables 24 through 44 may differ from totals found in corresponding tables classified by enrollment group only (Tables 1 through 23) because some school systems which provided staffing data

included in the tables classified by enrollment group did not provide data on per pupil expenditure used in the tables classified by both per pupil expenditure and enrollment. Because the survey sample was stratified by enrollment only, the data in Tables 24 through 44 may be subject to considerable sampling variation and should be used only as *general* indicators of the *current* relationships among categories of school systems with various levels of per pupil expenditure. Moreover, since staffing ratios are often related to the size of the school system, i.e., enrollment^{2/}, summary data for each expenditure level are presented separately for each of the four enrollment groups. These tables thus help clarify the relationship of school system size and wealth to staffing ratios, which might otherwise be distorted if the data were tabulated on the basis of expenditure level alone.

Tables 1 and 2 present summary data on the mean number of pupils and number of teachers per selected professional and administrative staff member in reporting school systems, by enrollment group. Tables 3 through 14 show percent distributions, means and medians, and ranges, of the number of *pupils* per professional and administrative staff member, by enrollment group. Tables 15 through 21 give the same information, by enrollment group, on the number of *teachers* per professional and administrative staff member. Tables 22 and 23 report percent

^{2/} This is particularly true for central-office staff where the number of professional staff members remains fairly constant up to a certain system size. In very small systems, for example, there is usually at least one administrator (the superintendent) even for small enrollment levels, leading to disproportionately low pupil-staff ratios.

distributions of the number of pupils and the number of teachers per teacher aide, by enrollment group. Tables 24 through 35 present means and medians, first and third quartiles, and ranges of the number of *pupils* per professional and administrative staff member in reporting school systems, by per pupil expenditure and enrollment group. Tables 36 through 42 give the number of *teachers* per selected professional and administrative staff member, classified by both per pupil expenditure and enrollment. Tables 43 and 44 include data, in the same format, on the number of pupils and the number of teachers per teacher aide.

Table 1 shows summary data on the mean number of pupils per professional and per administrative staff member at the school building level, the central-office level, and both levels combined, by four enrollment groups. Table 2 gives similar information for the number of teachers per staff member.

Table 3 shows percent distributions, means and medians, and ranges of the number of pupils per teacher in reporting school systems, by enrollment group. Data in Table 4 are reported in the same format on the number of pupils per counselor; Table 5, on the number of pupils per librarian; and Table 6, on the number of pupils per teacher, counselor, and librarian. Table 7 includes percent distributions, by enrollment group, of the number of pupils per school nurse. Table 8 provides percent distributions of the number of pupils per school building level professional staff member. (See page 3 for an explanation of the positions included in this category.)

Table 9 reports, by enrollment group, percent distributions of the number of pupils per principal; Table 10, on the number of

pupils per assistant principal; and Table 11, on the number of pupils per school building level administrative staff member, which includes principals, assistant principals, and deans.

Table 12 includes percent distributions of the number of pupils per central-office professional staff member. Table 13 gives percent distributions of the number of pupils per central-office and school building level administrative staff member, by enrollment group, in reporting school systems. Table 14 provides the same information on the number of pupils per central-office and school building level professional staff member. (See page 3 for definitions of these position categories.)

Table 15 reports percent distributions of the number of teachers per principal, by enrollment group; Table 16, on the number of teachers per assistant principal; and Table 17, on the number of teachers per school building level administrative staff member, which includes principals, assistant principals, and deans.

Table 18 shows percent distributions of the number of teachers per school building level professional staff member (excluding teachers) in reporting school systems, by enrollment group; Table 19, on the number of teachers per central-office professional staff member; Table 20, on the number of teachers per central-office and school building level administrative staff member; and Table 21, on the number of teachers per central-office and school building level professional staff member (excluding teachers) in reporting school systems. (Explanations of these position categories are found on page 3.)

Table 22 presents percent distributions, means and medians, and ranges of the number

of pupils per teacher aide, which includes both instructional and noninstructional teacher aides, by enrollment group. Table 23 gives this information for the number of teachers per teacher aide.

Table 24 includes means and medians, first and third quartiles, and ranges of the number of pupils per teacher, classified according to five per pupil expenditure categories and four enrollment groups. Table 25 reports these summary data on the number of pupils per counselor; Table 26, on the number of pupils per librarian; and Table 27, on the number of pupils per teacher, counselor, and librarian. Table 28 gives summary data, by per pupil expenditure and enrollment group, on the number of pupils per school nurse in reporting school systems. Table 29 provides this information on the number of pupils per school building level professional staff member. (For a definition of positions included in this aggregate category, see page 3.)

Table 30 provides means and medians, first and third quartiles, and ranges of the number of pupils per principal in reporting school systems, by per pupil expenditure and enrollment group; Table 31, on the number of pupils per assistant principal; and Table 32, on the number of pupils per school building level administrative staff member, which includes principals, assistant principals, and deans.

Table 33 includes summary data, by per pupil expenditure and enrollment, on the number of pupils per central-office professional staff member in reporting school systems; Table 34, on the number of pupils per central-office and school building level administrative staff member; and Table 35, on the number of pupils per central-office and school building level professional staff member. (See page 3

for definitions of these aggregate pupil-staff categories.)

Table 36 gives the mean and median, first and third quartiles, and ranges of the number of teachers per principal, by per pupil expenditure and enrollment group; Table 37, on the number of teachers per assistant principal; and Table 38, on the number of teachers per school building level administrative staff member, which includes principals, assistant principals, and deans.

Table 39 shows, by per pupil expenditure and enrollment group, summary data on the number of teachers per school building level professional staff member (excluding teachers) in reporting school systems; Table 40 reports the same data on the number of teachers per central-office professional staff member. Table 41 presents this information on the number of teachers per central-office and school building level administrative staff member and Table 42, on the number of teachers per central-office and school building level professional staff member (excluding teachers) in reporting school systems. (For definitions of these categories, see page 3.)

Table 43 gives summary data on the number of pupils per teacher aide, and Table 44, on the number of teachers per teacher aide, classified by per pupil expenditure and enrollment group. As in Tables 22 and 23, this category includes both instructional and non-instructional teacher aides.

PROPER USE OF DATA

For proper use of the data, the following must be recognized: (1) the purpose of the survey; (2) the nature of the sample design and limitations of the data, and (3) the

unusual skewing associated with school system statistics.

As stated previously, the purpose of the survey is to provide school officials and others concerned with staffing patterns in public schools with data by which to compare staffing ratios in one system with those in systems of comparable enrollment size and per pupil expenditure level. A national panel sample of school systems stratified by four enrollment groupings--large, medium, small, and very small--was systematically selected for this purpose, as described on page 4. The data reported for the large and medium strata are not subject to sampling errors since all of these school systems were included in the study; however, these data may be subject to possible nonresponse bias. Except for the usual problems of possible nonresponse bias, the data reported for the small and very small enrollment strata should be as accurate as sampling variation allows, modified to the degree that the panel selection procedures described on page 4 might have affected the representation of systems in the strata.

Because of underreporting in some enrollment groupings, caution should be employed in the use of data for these groups. No attempt has been made to weight the stratified data to estimate national statistics such as the national average pupil-teacher ratio. However, the data for the strata have been combined to provide information for all reporting systems in the study.

The survey instrument collected information from which budgeted per pupil expenditure for current operations could be computed for reporting school systems. These computations were made by ERS and were used to post-stratify data into five expenditure

categories. No effort was made to select a representative sample of school systems from each expenditure level; therefore, these data should be used with caution since they may be subject to considerable sampling and/or response variation for some categories of personnel. These data are intended only as general indicators of the current relationships among these groups of school systems.

It should again be noted that the tables which report data by both per pupil expenditure and enrollment size are included only to help analyze more clearly the relationships of school system size and expenditure level to staffing ratios. These relationships might otherwise be distorted if the data were presented on the basis of per pupil expenditure level alone and enrollment size were not considered. The sampling and/or response variation in these categories, however, could be quite large, so special caution should be exercised when using these data.

Due to constraints in the data collection procedure, enrollment figures reported to ERS include pupils in *all* grades taught in the school system. Of the 1,159 responding school systems, approximately 90 percent were unified (K-12) school systems, 7 percent were elementary systems, and 3 percent were high school systems. Most of the nonunified systems in the sample typically are located in Arizona, California, Illinois, and New Jersey.

Ratios for staff positions which are filled primarily at the elementary level (e.g., teacher aides) or at the secondary level (e.g., assistant principals and counselors) tend to show wide variation when computed on the basis of total enrollment and teaching staff in grades K-12 for unified systems and on the basis of enrollment and teaching staff data for the nonunified (elementary and high school) systems.

An examination of staffing ratio data for these three positions in an elementary, high school, and unified school system, as shown in Table B, illustrates this relationship and may aid in proper interpretation of the summary data contained in this Report. In addition, elementary and high school systems are identified as "(ELEM.)" and "(H.S.)" in the system-by-system listing beginning on page 46.

Variations in the data may also occur with ratios involving school nurses and librarians. For example, a large school system may have reported few school nurses for the entire system because nursing services are primarily provided by the city or county instead of by the school system itself. Thus, the pupil-school nurse ratio may be disproportionately high. Likewise, some systems that use teachers as part-time librarians may show relatively high pupil-librarian ratios, since school systems were

asked to report persons with several responsibilities in the personnel category in which the greatest portion of the employee's time is spent.

Users of the *current* data found in this Report may find it helpful to consult *Guidelines for School Staffing Ratios*^{3/}, a 1974 ERS publication which presents a comprehensive overview of *recommendations* offered by professional organizations, mandates contained in statutes and state regulations, policies established by local school boards, and provisions adopted in locally-negotiated contracts between school boards and employee organizations.

^{3/} *Guidelines for School Staffing Ratios* is available from ERS for \$6.00 a copy. Payment must accompany orders of less than \$10.00. Billed invoices will include postage and handling charges.
